GoWand™

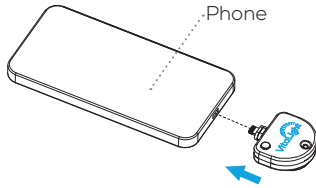

User Manual

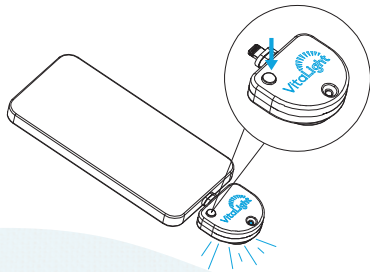

**WARNING UVC emitted from this product.**  
Avoid eye and skin exposure to unshielded product.  
Follow installation instructions and user manual.

## How to use the UVC GoWand™

1. Remove the device from its case.
2. Insert type C or lightning connector of device into your phone. Your device must be unlocked so that the GoWand™ can receive power.

3. Hold the phone and GoWand™ less than 2/3 inch from surface and press the power button to turn on the UVC light. The blue LED indicator will flash for 15 seconds. After 15 seconds the device will shut off.

**ATTENTION: UVC light cannot be seen.**  
The blue light emitted is for a reference to guide where the effective area is being sanitized.

**A full 15 seconds or greater is required to eliminate up to 99.9% of Viruses and Bacteria.\***  
Shorter exposure time is not guaranteed to inactivate any Viruses and Bacteria.

Please visit [vitalight.com](http://vitalight.com) for the latest testing data and for more information.

4. UVC light will sanitize where it is directly in contact with a surface. Edges and shadow areas should be sanitized by moving the light over those areas for an additional 15 seconds after the initial 15 seconds is complete. Press the power button to start supplemental 15 second sanitizing cycles.

**The quartz glass is fragile. Please handle with care.**

## Specifications

Voltage	5V DC
Wavelength	270nm
Light Source	5 x UVC LED
Lifetime	1 Million+ Cycles
Working Temp	-20°C~40°C

## Warning

**Do not attempt to look at UV LEDs while unit is on.**  
UV light can be irritating to the eyes and skin.

\*When used as instructed and based on 3rd party testing on Staphylococcus aureus (Staph), Escherichia coli (E. Coli), and SARS-CoV-2 (COVID-19). Real world results may vary depending on disinfection distance and surface material. Direct exposure to UVC light is required to kill viruses and bacteria. Surface areas not directly exposed may not be fully disinfected.
